

No Gurry (grog) for Healthy Babies

Having alcohol any time in your pregnancy can hurt your baby

What is FASD?

FETAL ALCOHOL SPECTRUM DISORDER (FASD)

is caused by drinking alcohol during pregnancy. It can affect the development of a baby's brain and body in different ways.

Drinking alcohol during pregnancy can make kids:

Be born small
and grow slow

Have a short
temper

Have trouble
at school

Not remember
things

Have trouble hearing
and speaking

These troubles are sometimes called **FASD**.

Making FASD History in the Pilbara

The Telethon Kids Institute is working with Wirraka Maya Health Services and BHP Billiton to help make FASD History in the Pilbara:

- ▶ Stop kids being born with FASD
- ▶ Diagnose kids who might have FASD
- ▶ Support kids and families affected by FASD
